Re: Medical Expert Testimony / Questions & Answers

Dear Dr. Clements,

As my doctor for more or less of (8) years, would you provide me with the following answers to the following questions concerning my medical issue(s) dealing with Osteomyelitis:

1. Your qualifications in the field of medicine / surgeon and and your extent of evaluations of biopsies, X-rays, MRI, CT scan, etc.
2. the importance of biopsy(s) tissue, etc. in correctly indentifying the bacteria in order to use the correct anti biotics.
3. If there are three (3) different types; E-Coli, Mrsa, Staph, and no tissue biopsy done in the beginning, and on Digital X-ray, reccomending CT scan, to be done by technician, yet Dr. failed to order CT scan. Would you have ignored the techs. recommendations?
4. If an infection is not treated, how many days would it take for Osteomyelitis to set into the bone?
5. If both feet were confirmed to have Osteomyelitis by way of CT scan but yet only one foot (right) was treated then 81/2 months later which allowed the bacteria to re-emerge in untreated foot that would lead to re-section?
6. What are the consequences of vegetation on the heart valve?
7. Would you be willing to testify to the above questions in Federal Court or provide a written report to the following address: Clerk, United States District Court, 210 Franklin Road SW, ste.-540, Roanoke, Virginia 24011-2208 for me as my expert witness in the matter of: Frith v. Clarke, et al., CL7:22-cv-000389.

Thank You!

Rodney Vance Frith
